

gravity zero

Ultralight. Designed for extended wear.

Impact protection to AS/NZS 1337

- Impact and maximum UV protection
- High performance polycarbonate lenses
- Exceeds most international standards
- Duo-spherical wrap-around lens

Australian Standard

AS/NZS 1337
Lic. No. 0794

Lens exchange – a matter of seconds

- One piece lens shield
- Easy lens exchange for different working environments
- Saves time and expense
- Saves the environment and resources
- Optimum protection from wind and sun (100% UV protection)

Perfect fit

- Greater number of contact points with the head than conventional spectacles
- Secure, firm hold – even during strenuous activities and awkward head positions such as working at height or with downward looking perspective

Wide inclination range

- Multiple settings to suit different face shapes
- Quick and simple adjustment to personal requirements.

Helmet & Earmuff Compatibility

- Slimline adjustable temple arms
- Designed for extended comfortable wear by muff & helmet wearers

Distinguished by their perceived lightness, highest innovation and patented technology.

THS

THS is an anti-fog coating in combination with improved antiscratch and cleaning features. THS prevents dust particles from getting into the surface structure and therefore allows easier cleaning with less abrasion. THS enables optimum vision in even the most demanding, hot, wet, cold or humid conditions.

HC 3000

HC 3000 is a Super Hard Coating with Sapphire Effect. Both sides of the lens are treated with an extremely effective anti-scratch coating that qualifies this coating for even the harshest environments.
